

Muril

HIGHLY ALCALINE INDUSTRIAL CLEANER

Muril is a highly alkaline industrial cleaner, which easily and thoroughly removes heavy soil and stubborn fat and oil residues, old, multilayer coatings as well as soot. It shows a very good emulsification ability and is especially designed for industrial cleaning of workshops and sanitary floors in factories. Due to the highly active ingredients and low foaming properties **Muril** can be used in scrubber-dryer machines.

Application area: All solvent and alkali resistant surfaces. Not suitable for wooden floors, laminate and textile floors.

- **Performance:** Strong emulsification of fat and oil residues.
- **Efficiency:** One product for multiple floor cleaning and stripping application.
- **Safety:** High performance formula for removing oily slippery residues on antislip floorings.

USE INSTRUCTIONS

1 	2
3 	4
5 	6
7 	8

- 1 Check product label and hygiene plan for detailed use information.
- 2 Wear suitable protective clothing when handling cleaning products.
- 3 For stripping of coatings dilute **Muril** 1:10 to 1:1 with water in a bucket or in the single disc tank.
- 4 Apply the solution on the floor.
- 5 Scrub the floor systematically with a single disk machine.
- 6 Collect the dirt with a wet vacuum cleaner.
- 7 Rinse with clear water after cleaning and let it dry.
- 8 For use in scrubber dryers, dilute **Muril** 0,5 - 1% in water. Scrub the floor and remove the dirt in the same time.

SPECIAL NOTES / INFORMATION

Check color and material resistance prior to application. Position warning signs „Attention wet floor“ and leave in place until surface is totally dry.

For professional use only!

Safety Data Sheet for professional users available on request.

SAFETY
